

Autolyse^{ROSÉE}

At the end of the fermentation and while the ageing on lees in bottle, the yeast gradually die, the phenomenon of "Autolyse" takes place : this is the realizing of some molecules which interacts with the wine and provides power and complexity.

"Autolyse", from selected plots and matured ten years on lees in the cellar, **celebrating the time and its imprint on the wine.**

Terroir

Côte de Sézanne
45 years-old vineyard,
